Slab that redefines granite

800x7600 MM

Granite is popular for its deep textures and colors, but it's also known for its weight and fragility. That's why it's not always the best choice for a modern kitchen or bathroom. The Ultima slab is made of a special blend of granite and resin, making it lighter and stronger than traditional granite. It's also available in a variety of colors and patterns, so you can find the perfect look for your space.
